

ACACIA CRASPEDOCARPA LEATHERLEAF ACACIA

This evergreen, thornless shrub from Australia has round, thick, leathery gray-green leaf-like phyllodes. This erect, compact shrub grows slowly to 10 to 15 feet tall and wide, and is reminiscent of a large boxwood. It may be grown as a large shrub or trained into an attractive small patio tree. The bright yellow catkin-like flowers appear spring through summer, followed by large flattened seedpods. It performs best in full sun and reflected heat, and needs good drainage. It is cold hardy to 20 ° F. USDA Zone 9.

AT A GLANCE SUMMARY

SIZE (H X W)	10 feet x 15 feet
FLOWER COLOR	Yellow
FLOWER SEASON	Spring-Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	20° F, USDA Zone 9
PRUNING	Prune into tree form
