

## AGAVE ANGUSTIFOLIA V. MARGINATA

Native to tropical Costa Rica and Mexico, this light green and cream variegated agave is cold-hardy to 20° F. The stiff leaves are about 1½ inches wide, with creamy yellow stripes along the margins. This species forms clumps to 3-4 feet tall and wide. It tolerates full sun, part shade and reflected heat. However, in low deserts it looks best when grown in filtered shade. It can also handle more water than most agave species. USDA Zone 9.

AT A GLANCE SUMMARY	
SIZE (H X W)	3-4 feet x 3-4 feet
FLOWER COLOR	Yellow-green
FLOWER SEASON	November - March
EXPOSURE	Full sun, reflected heat, part shade
WATER	Low
GROWTH RATE	Slow
HARDINESS	20° F, USDA Zone 9
PRUNING	None
