

AGAVE CHRYSANTHA

This solitary agave is native to central Arizona at elevations from 3000 to 6000 feet. The bold, upright leaves are deeply channeled and are usually blue-gray in color. Mature size for the plant is 3 feet tall by 5 feet wide. The branched flower stalk produces glorious clusters of bright gold flowers, and an abundance of nectar. It will die after flowering and will need to be replaced. Plant in full sun, provide good drainage, and treat for agave snout weevil as necessary. Hardy to about 17° F. USDA Zone 8.

AT A GLANCE SUMMARY

SIZE (H X W)	3 feet x 5 feet
