

AGAVE POTATORUM BUTTERFLY AGAVE

This beautiful, petite agave tops out at about 1 to 2 feet tall by 2 feet wide. The striking blue-gray leaves terminate in a distinctive, often twisted, reddish spine. The leaf margins display pronounced swellings at the base of the teeth. Although considered quite tender below 25° F, Butterfly Agave is ideal for use in low desert locations. *Agave potatorum* is native to the Mexican states of Puebla and Oaxaca at elevations from 4500 to 7500 feet.

AT A GLANCE SUMMARY

SIZE (H X W)	1-2 feet x 1-2 feet
FLOWER COLOR	White-orange
FLOWER SEASON	Summer
EXPOSURE	Full sun, pt shade
WATER	Low
GROWTH RATE	Slow
HARDINESS	25° F, Zone 9
PRUNING	None
