

ALOE DAWEI DAWE'S ALOE

For fiery winter color, you can rely on *Aloe dawei*. January and February are the peak color months for this succulent. This native of Uganda sends up branched spikes crowned with clusters of intense orange-red tubular flowers, which are irresistible to hummingbirds. This aloe grows at a moderate rate to form clumps to 3-4 feet tall and wide. Bi-monthly irrigations will keep it looking lush and accelerate the growth rate. However, water sparingly in the winter months, or damping off might occur. The long, narrow, bright green leaves are edged with small teeth. Plant *Aloe dawei* in full sun to part shade, and in well-drained soil. Avoid placing it in reflected heat exposures. This aloe is hardy to 25° F.

AT A GLANCE SUMMARY

SIZE (H X W)	3 - 4 x 3 - 4
FLOWER COLOR	Orange - Red
FLOWER SEASON	Late Winter - Early Spring
EXPOSURE	Full Sun to Part Shade
WATER	Low to Moderate
GROWTH RATE	Moderate
HARDINESS	25° F, USDA Zone 9
