

ALOYSIA VIRGATA

Native to Argentina, this shrub has an upright habit with slightly weeping branches. Mature plants may reach 15 feet in height and 5 feet in width. Highly fragrant, delicate white flower spikes are produced on branch tips from early spring through summer. The flowers are attractive to butterflies and bees. This shrub is mostly evergreen, with fine-textured gray-green foliage. It responds well to light shearing, especially after flowering. *Aloysia* performs well in full sun to partial shade, and is adaptable to many different soil types. Hardy to 10° F. USDA Zone 8.

AT A GLANCE SUMMARY

SIZE (H X W)	15 feet x 5 feet
FLOWER COLOR	White
FLOWER SEASON	Spring-Summer
EXPOSURE	Full Sun to Part Sun
WATER	Low
GROWTH RATE	Moderate
HARDINESS	10° F, USDA Zone 8
PRUNING	Prune into tree form
