

BAUHINIA LUNARIOIDES syn. B. CONGESTA ORCHID TREE

This airy, semi-evergreen shrub or small tree is native to west Texas and Mexico. The gray-green, bilobed leaves are shaped like little butterflies. Small, delicate five-petaled flowers are produced from late spring to early summer. Plants may be found with pink or white flowers and are offered by color preference. It is tolerant of sun and drought, but also handles part shade and ample moisture. Although tolerant of most soils, it requires good drainage. The growth rate will be slow to moderate depending on available moisture. This plant is brittle, and should be protected from strong winds.

AT A GLANCE SUMMARY

SIZE (H X W)	12 Feet x 10 feet
FLOWER COLOR	Pink or White
FLOWER SEASON	Spring - Summer
EXPOSURE	Full Sun to Part Shade
WATER	Low
GROWTH RATE	Slow to Moderate
HARDINESS	10° F, USDA Zone 7
PRUNING	To Thin or Shape

SHRUB
