

DALBERGIA SISSOO ROSEWOOD

This evergreen to semi-evergreen tree provides a lush look for low desert gardens. The bright glossy green leaves are reminiscent of aspen or cottonwood. Eventually this tree can reach a mature size of 50 feet tall and wide. Its growth rate is quite fast if ample water is available. However, trees should be hardened off for the first few winters to avoid frost damage. Young trees are semi-deciduous, but trees become more evergreen as they mature. Rosewood is useful in erosion control as it has a wide spreading root system. It thrives in lawn settings, as well as hot, reflected heat, granite areas. This tree is evergreen to 30°F. USDA Zone 9.

AT A GLANCE SUMMARY

SIZE (H X W)	50 feet x 50 feet
FLOWER COLOR	Inconspicuous
EXPOSURE	Full sun, reflected heat
WATER	Low to Moderate
GROWTH RATE	Fast
HARDINESS	30° F, USDA Zone 9
PRUNING	Prune to shape
