

## DASYLIRION MIQUIHUANENSIS

This arborescent (tree-like) desert spoon is native to northeast Mexico. The long, narrow glossy green leaves have a stiff, upright habit. Plants will slowly develop a trunk laden with the persistent, brown foliage, creating a thick skirt. Similar in many respects to *Dasylyrion acrotriche*, the leaves are somewhat longer. Mature plants may reach a height of 6 feet or more. Hardy to 15°F, it is placed in USDA Zone 8.

### AT A GLANCE SUMMARY

SIZE (H X W)	6 feet x 5 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	15° F, USDA Zone 8
PRUNING	Remove Old Flowers
