

## EUCALYPTUS CAMALDULENSIS var. OBTUSA RED RIVER GUM

This massive, fast growing, evergreen shade tree is native to Australia. Mature specimens may eventually reach over 100' tall. The rate of growth and ultimate mature size are dependent on the frequency and availability of water. The lance-shaped, pale green to gray green leaves vary from 4 to 8 inches in length. The nearly inconspicuous flowers are white to yellow, followed by woody seed capsules. The bark of this tree peels to reveal white or gray bark underneath. Due to its immense size this tree should be reserved only for large parks and open areas. Plant in full sun.

AT A GLANCE SUMMARY	
SIZE (H X W)	80 feet x 50 feet
FLOWER COLOR	Yellow
FLOWER SEASON	Spring
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Moderate to Fast
HARDINESS	20° F, USDA Zone 9
PRUNING	To Thin & Shape
