

LEUCOPHYLLUM FRUTESCENS WHITE CLOUD™

The large white flowers of this Texas A&M clone provide a cool contrast when mixed in with purple or pink-flowering Texas rangers. Funnel shaped flowers are produced in abundance when the humidity rises. The grey foliage allows it to blend in well with our Sonoran desert natives. A good background shrub, White Cloud™ has a somewhat rangy form to about 6 feet. As a result many people tend to shear the plant which removes the flower buds. It should be selectively pruned in the fall after flowering.

AT A GLANCE SUMMARY

SIZE (H X W)	6-8 feet x 6-8 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Moderate
HARDINESS	10° F, USDA Zone 7
PRUNING	To Shape

SHRUB
