

MUHLENBERGIA LINDHEIMERI AUTUMN GLOW™

This Texas native makes a great backdrop for *Muhlenbergia capillaris* Regal Mist™. During the fall months, its tall spikes of light yellow flowers glow when backlit by the sun. The narrow, light green leaves form a dense mound to 5 feet tall and wide. Autumn Glow™ is very adaptable, tolerating full sun to almost full shade, and most soil types. It is a good choice for retention basins or other areas that receive periodic flooding. It is hardy to -10 ° F. USDA Zone 6.
