

## MUHLENBERGIA RIGIDA NASHVILLE™

Sometimes a small, low-growing grass is needed as a border or in areas with site visibility restrictions. Nashville™ fits the bill, growing to about 2 feet tall and wide. It has fine-textured light green foliage that goes completely dormant in the winter, even in low desert locations. In the late summer and fall it sends up purple-tan spikes that dry to a wheat color. Its growth requirements and habits are very similar to those of Deer Grass, and it is also hardy to 0° F, USDA Zone 7.

AT A GLANCE SUMMARY	
SIZE (H X W)	2 feet x 2 feet
FLOWER COLOR	Purple-tan
FLOWER SEASON	Summer - Fall
EXPOSURE	Full sun, reflected heat, part shade
WATER	Moderate
GROWTH RATE	Moderate
HARDINESS	0° F, USDA Zone 7
PRUNING	Cut back in early spring
