

## NOLINA BELDINGII

This Texas native is an arborescent (tree-like) species that is rarely seen in cultivation. Forming rosettes with hundreds of closely set leaves, it makes an excellent accent plant that will grow slowly to a height of 6 feet and produce a crown 4 feet across. The flat green leaves have sharp margins and curly-Q's on the tips. Creamy white flowers are produced on tall stalks held above the foliage. Plant in full sun and well-drained soil. Hardy to 15° F it is placed in USDA Zone 8.

### AT A GLANCE SUMMARY

SIZE (H X W)	6 feet x 4 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	15° F, USDA Zone 8
PRUNING	Remove Dried Stalk

ACCENT
