

OENOTHERA CAESPITOSA WHITE EVENING PRIMROSE

Tufted evening primrose is perfect for moonlit gardens. From spring through late summer it produces masses of huge white flowers that open in the late afternoon. They close in the morning as temperatures heat up, fading to pink. The fragrant flowers are at least 4 inches in diameter, and stand out against the large dark green leaves. Tufted evening primrose occurs across the western United States, from 4500 to 7500 foot elevations, and is hardy to -20° F. It also handles summers in the low deserts, but needs excellent drainage. USDA Zone 5.

AT A GLANCE SUMMARY

SIZE (H X W)	1 foot x 3 feet
FLOWER COLOR	White
FLOWER SEASON	Spring - Summer
EXPOSURE	Full sun, part shade
WATER	Low
GROWTH RATE	Fast
HARDINESS	-20° F, USDA Zone 5
PRUNING	Prune to encourage new growth
