

ROSMARINUS OFFICINALIS 'ARP' ARP ROSEMARY

This aromatic herb is native to the Mediterranean, and this selection was made in Arp, Texas for its superior cold hardiness and dark green, fine textured foliage. Only growing 2 to 3 feet tall by 4 to 5 feet wide, the mounding habit of Arp makes it a great sub-shrub or groundcover. Dark blue flowers are produced in the spring and fall, attracting many bees. Plant in full sun and provide room to spread. According to the US Arboretum, Arp is reliably hardy to 0° F and is placed in USDA Zone 7.
