

TECOMA X SUNRISE™

This Mountain States selection has a lengthy bloom period, producing glorious spikes of orange-yellow flowers from spring to fall. Sunrise™ has a burnished copper color on the flower buds and the back of the inflorescence. This plant has a clean habit, as it drops old, spent flowers quickly. It doesn't set seed until late in the season, which means a constant supply of new blossoms during the summer. Hummingbirds are drawn to the tubular flowers. It is considered slightly hardier than 'Gold Star', but if frost damage should occur, cut the plant back in early spring to rejuvenate growth. In warmer regions, the plant may reach 8 feet tall and wide. USDA Zone 8.

AT A GLANCE SUMMARY

SIZE (H X W)	8 feet x 8 feet
FLOWER COLOR	Orange-yellow
FLOWER SEASON	Spring - Fall
EXPOSURE	Full sun, part shade
WATER	Low to moderate
GROWTH RATE	Fast
HARDINESS	10° F, USDA Zone 8
