

YUCCA FAXONIANA SPANISH DAGGER

Synonym: *Yucca carnerosana*. Spanish Dagger is native to Mexico. This arborescent (tree-like) yucca is usually single-trunked, although multi-trunked specimens are possible. The size of a mature plant may vary from 7 to 20 feet in height by 4 to 8 feet across. The stiff, dull green leaves have a dark brown stripe on the margin and fuzzy white fibers peeling from the leaf edge. The branched inflorescence rises above the foliage in the summer, producing creamy white flowers. Plant in full sun and well drained soils. Hardy to 0° F. USDA Zone 6.

AT A GLANCE SUMMARY

SIZE (H X W)	7-20 feet x 4-8 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	0° F, USDA Zone 6
PRUNING	Remove Spent Flower Stalks
