

YUCCA RUPICOLA TWISTED LEAF YUCCA

Twisted leaf yucca is ideal for small spaces. This petite, stemless yucca forms a clump to about 2 feet tall by 2 to 3 feet wide. Its contorted bright green leaves twist and turn, giving this plant a distinctive form. In the summer it produces 5-foot-tall, open spikes of creamy white flowers. Native to central Texas, this yucca is often found growing under the broken shade of mesquites and oaks. Twisted leaf yucca thrives in full sun to part shade, provided that the soil is well-drained. *Yucca rupicola* hybridizes readily with *Yucca pallida*, resulting in seedlings with gray-blue, twisted leaves. Twisted leaf yucca is hardy to -10° F.

AT A GLANCE SUMMARY

SIZE (H X W)	2 feet x 2-3 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full Sun to Part Shade
WATER	Low
GROWTH RATE	Slow
HARDINESS	-10° F, USDA Zone 6
PRUNING	Remove Spent Flower Stalks
