

Rabbit Resistant Plants

RABBIT-RESISTANT (?) PLANTS

This list is not foolproof! If your resident rabbits are hungry enough, they'll eat just about anything. If possible, protect all new plants with chicken wire initially. Also, use the largest plants you can afford (ie: 5 gallons instead of 1 gallons). Also, we'd love to add plants to this list, so please let us know if other things work for you!

Agave species (Although jackrabbits will munch on softer-leaved agaves)
Asclepias subulata...Desert milkweed (Use a cage to protect when young!)
Baccharis species
Berberis species...Barberry
Buddleia marrubiifolia...Woolly butterfly bush
Calliandra eriophylla...Pink fairy duster (Use a cage to protect when young!)
Cordia parvifolia...Littleleaf cordia
Dalea capitata **Sierra Gold™**
Encelia farinosa...Brittlebush
Ericameria laricifolia...Turpentine bush
Eriogonum species
Euphorbia biglandulosa...Gopher plant
Justicia californica...Chuparosa (Use a cage to protect when young!)
Lantana species
Leucophyllum species (use 5 gallon or larger size containers for best results)
Melampodium leucanthum...Blackfoot daisy
Nolina species...Beargrass
Penstemon species
Salvia species
Santolina species
Simmondsia chinensis...Jojoba
Sophora secundiflora...Texas mountain laurel
Verbena species (may be eaten when plants are young and succulent)
Zauschneria californica...Hummingbird bush
