

Chilopsis linearis 'Bubba' Bubba Desert Willow

Chilopsis linearis 'Bubba' is a vigorous, fast-growing selection of desert willow that originated in Texas. Compared to other selections it has a strong vertical form and is less shrubby. It also has glossy, darker green, more lush foliage than other desert willows. It has the capacity to easily grow up to 30 feet tall in the landscape. Starting in late spring and through the summer 'Bubba' produces masses of large, fragrant, two-tone burgundy and pink flowers. Although it is deciduous in the winter, during the warm season it is covered with glossy, dark green leaves. It can produce a few seed pods but not in abundance. 'Bubba' desert willow is hardy to -10°, USDA zone 6.

AT A GLANCE SUMMARY

SIZE (H X W)	25 to 30 feet
FLOWER COLOR	Burgundy and pink
FLOWER SEASON	Summer
EXPOSURE	Full sun
WATER	Low to moderate
GROWTH RATE	Moderate to fast
HARDINESS	-10° F, USDA Zone 6
PRUNING	Prune to shape
