

HAVARDIA PALLENS SIERRA SPARKLER™

This small evergreen tree is similar in all respects to the species which is native to south Texas and northeast Mexico. The distinctive characteristic of Sierra Sparkler™ is the minimal seed pod production. This selection is better suited for use near walks or patios. Medium-green compound leaves provide a lacy silhouette. Fragrant, white puffball flowers grace the tree from late spring into mid-summer. Young trees bear thorns but they diminish in numbers as the tree ages.

Synonym: *Pithecellobium pallens*

AT A GLANCE SUMMARY

SIZE (H X W)	25-30 feet x 15-20 feet
FLOWER COLOR	White
FLOWER SEASON	Spring - Summer
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	15° F, USDA Zone 8
PRUNING	To Thin & Shape
