

## LEUCOPHYLLUM CANDIDUM THUNDER CLOUD™

This evergreen Texas native has a densely-branched, compact form with silver stems and tiny silver leaves. A trademarked clone of Texas A&M University, it blooms repeatedly during the summer and fall with deep violet flowers. This selection is almost identical in appearance to Silver Cloud™, but is smaller. The *L. candidum* varieties are especially susceptible to rotting out if over-watered; well-drained soil is essential! Plant this clone on a sunny slope for ideal drainage. It is paired below with *Yucca rostrata*, *Hesperaloe parviflora* Brakelights® PP# 21729, and Mexican poppies.

### AT A GLANCE SUMMARY

SIZE (H X W)	3 feet x 3-4 feet
FLOWER COLOR	Deep Violet
FLOWER SEASON	Summer, Fall
EXPOSURE	Full Sun, Reflected Heat
WATER	Low
GROWTH RATE	Slow
HARDINESS	10° F, USDA Zone 7
PRUNING	Shear in late Spring if at all
