

MALEPHORA LUTEA ROCKY POINT ICE PLANT

Collected from a yard in Rocky Point, Mexico, this groundcover has succulent, bright green leaves that provide a lush backdrop for yellow daisy-like flowers. It will bloom on and off nearly all year. It should be planted in full sun and well-drained soils. The succulent foliage may burn a bit in the summer, but re-grows quickly once the weather cools off. Thirsty birds may peck at the elongated, bean-shaped leaves to extract liquids in the summer. It is native to South Africa. Although it is a good substitute for lawns it will not bear foot traffic.

AT A GLANCE SUMMARY	
SIZE (H X W)	1 foot x 3-4 feet
FLOWER COLOR	Yellow
FLOWER SEASON	Blooms Throughout Year
EXPOSURE	Full Sun, Part Shade
WATER	Low to Moderate
GROWTH RATE	Fast
HARDINESS	15° F, USDA Zone 8
PRUNING	Cut back in the fall if summer browning occurs
