

MUHLENBERGIA CAPILLARIS REGAL MIST®

This native of east Texas can literally stop traffic during fall bloom! The haze of deep pink flowers covering the plant is especially stunning when backlit by the sun. Regal Mist® is a small clump grass with narrow, glossy green leaves. The foliage forms a dense rosette with the frothy flowers adding another 1-2 feet of height in the fall months. This fast-growing plant should be cut nearly to the ground in late winter or early spring to remove the brown leaves and spent flowers. In cold regions it will turn winter dormant. Regal Mist® thrives in full sun and reflected heat locations, and even tolerates light shade. It is adapted to a wide range of soils. While it will survive with very little water, it needs ample irrigation to look its best in the summer-time. Reseeding has not been an issue.

AT A GLANCE SUMMARY	
SIZE (H X W)	3 feet x 3 feet
FLOWER COLOR	Pinkish Red
FLOWER SEASON	Fall
EXPOSURE	Full Sun, Reflected Sun, Filtered Sun
WATER	Moderate
GROWTH RATE	Fast
HARDINESS	0° F, USDA Zone 6
PRUNING	Shear in Late Winter

GRASS
