

PENSTEMON PINIFOLIUS PINELEAF PENSTEMON

This herbaceous perennial is native to the mountain forests of southwestern Arizona, southwest New Mexico and into Mexico. It bears pinkish-orange flowers from June through September on plants growing to 1 to 2 feet tall and wide. As the common name suggests, this plant has short needle-like foliage resembling that of a pine tree. This Penstemon demands excellent drainage and will be quite short-lived if over watered. In low elevations some afternoon shade is beneficial. Pineleaf Penstemon is hardy to -40°F. USDA Zone 3.

AT A GLANCE SUMMARY

SIZE (H X W)	2 feet x 2 feet
FLOWER COLOR	Pink-Orange
FLOWERING TIME	Summer
EXPOSURE	Full to Part Sun
WATER	Low
GROWTH RATE	Moderate
HARDINESS	-40° F, USDA Zone 3
PRUNING	Remove the spent flowers if desired
