

## PLUMBAGO SCANDENS SUMMER SNOW™

This sprawling shrub forms a dense mound of green foliage to 3 feet tall by 3 - 4 feet wide. Its vine-like habit makes it an ideal choice for spilling over walls or planters. Masses of white flowers provide a cooling effect from May through September. It's native range includes Baja California, southern Arizona and parts of Texas, where it grows in shady watercourses and canyons. Summer Snow™ is one of the best choices for shady exposures in the low deserts. It is hardy to 15° F.

AT A GLANCE SUMMARY	
SIZE (H X W)	3 feet x 4 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Part to Full Shade
WATER	Moderate
GROWTH RATE	Fast
HARDINESS	15° F, USDA Zone 8
