

Portulacaria afra minima Dwarf Elephant Food

This new selection of Elephant Food performs beautifully as a groundcover! Plants never grow above 6" tall, and are quite often even more prostrate. This nice little succulent has done quite well for us in the sun and shade. A good selection for containers or in the ground, Dwarf Elephant Food requires very little irrigation once established, usually just some supplemental water through the dry summer season.

AT A GLANCE SUMMARY

SIZE (H X W)	3-6" Tall x 2-3' wide
