

SALVIA X TRIDENT™

This plant is a three-way hybrid between *Salvia mojavensis*, *S. clevelandii* and *S. dorrii*. It retains the strong, pungent aroma of the Desert sage and the interesting whorled flowering spikes of the Cleveland sage while introducing compactness, extreme drought tolerance and hardiness to the mix. This shrub will top out at about 3 feet tall and wide. The showy flowers are dark cobalt blue. This salvia has performed well in the low deserts, where other species have suffered from the heat. It does require well-drained soils! Hardy to 0° F. USDA Zone 6.

AT A GLANCE SUMMARY

SIZE (H X W)	3 feet x 3 feet
FLOWER COLOR	Violet-blue
FLOWER SEASON	Spring, some in fall
EXPOSURE	Full sun to part shade
WATER	Low
GROWTH RATE	Moderate
HARDINESS	0° F, USDA Zone 6
PRUNING	Prune after blooming
