

SENNA WISLIZENII (syn. CASSIA WISLIZENII) SHRUBBY SENNA

One of the more widely cultivated sennas native to the Americas, this winter-deciduous shrub differs from its Australian counterparts in that it blooms from early summer well into the fall months. The showy, bright yellow flowers occur in clusters on the branch tips. The compound leaves have 3 to 7 bright green leaflets. This woody shrub has a rounded form, growing to 5-6 feet tall and wide. Shrubby senna is very heat and drought tolerant. It blooms more profusely when allowed to become very dry between deep irrigations.

AT A GLANCE SUMMARY

SIZE (HEIGHT x WIDTH)	5 -6 Feet x 5-6 Feet
FLOWER COLOR	Yellow
FLOWER SEASON	Summer, fall
EXPOSURE	Full sun, part shade
WATER	Low
GROWTH RATE	Moderate
HARDINESS	0° F USDA Zone 7
PRUNING	Prune to shape in winter
