

TAGETES LEMMONII 'COMPACTA' COMPACT MT. LEMMON MARIGOLD

This herbaceous evergreen perennial is native to Arizona and northern Mexico. The highly aromatic, fine textured medium green leaves are arranged on brittle stems. Electric yellow-orange daisy-like flowers provide intense fall color. Plants may be cut back hard in the later winter following flowering to remove any frost-damaged foliage and promote dense growth. For best results, plant in full to part sun and well-drained, fertile soil.

AT A GLANCE SUMMARY	
SIZE (H X W)	2-3 feet x 2-3 feet
FLOWER COLOR	Yellow-Orange
FLOWER SEASON	Winter-Spring, Fall
EXPOSURE	Full Sun, Part Shade
WATER	Moderate
GROWTH RATE	Fast
HARDINESS	5° F, USDA Zone 7
PRUNING	Shear After Flowering
