

QUERCUS GRAVESII CHISOS RED OAK, GRAVES OAK

Native to southwest Texas and into Mexico, Chisos Red Oak grows native at elevations of about 5000-6000'. Vibrant red fall color in habitat. Fast growing for an oak, Quercus gravesii will tolerate lower elevations with some supplemental irrigation but will likely not have as colorful of a fall show. This Oak has deeply lobed leaves that resemble Q. buckleyi, they will hold their leaves late into the season. Chisos Red Oak will grow to an eventual height of about 40' tall by 35' wide. Trees in the Dallas Fort Worth area have done well, but without much fall color. These have performed magnificently at our Cochise yard just a bit over 4000' in elevation.

AT A GLANCE SUMMARY

SIZE (H X W)	30-40' x 30-35'
FLOWER COLOR	Inconspicuous green
FLOWER SEASON	Spring
EXPOSURE	Full Sun
WATER	Low to Moderate
GROWTH RATE	Moderate
HARDINESS	0° F, USDA Zone 7
PRUNING	Prune to shape and remove dead wood
