

YUCCA RIGIDA BLUE YUCCA

Blue yucca, a trunk-forming species, grows to 12 feet tall, with minimal branching near the top. Its distinctive, powder blue leaves are rigid, with yellow margins. These blue leaves are about 3 feet long by 1 inch wide, and have a sharp spine at the tip. In the late spring the blue foliage is complemented by a showy 5 to 6 foot stalk of white flowers. For best growth, provide supplemental water in the summer, and plant in well-drained soils. Blue yucca can be planted in full sun or very light filtered shade

AT A GLANCE SUMMARY

SIZE (H X W)	12 feet x 8 feet
FLOWER COLOR	Creamy White
FLOWER SEASON	Late Spring
EXPOSURE	Full Sun, Reflected Heat
WATER	Low
GROWTH RATE	Moderate
HARDINESS	0° F, USDA Zone 6
PRUNING	Remove Spent Flower Stalk
