

Eucalyptus papuana Ghost Gum

This relatively small Eucalyptus tree has powdery white trunks, which contrast nicely with its large, light green lance-shaped eaves. It has a semi-weeping growth habit, and produces very little litter. The Arizona Department of Transportation was impressed by the performance of specimens on older freeway right-of-ways, and continues to specify it on new projects because it is not brittle in high winds and has light litter production. Ghost Gum does well in full sun and reflected heat exposures.

AT A GLANCE SUMMARY

SIZE (H X W)	40 feet x 25 feet
FLOWER COLOR	White
FLOWER SEASON	Spring
EXPOSURE	Full sun, reflected heat
WATER	Low
GROWTH RATE	Moderate
HARDINESS	20° F, USDA Zone 9
PRUNING	To thin and shape
